

Label Prefices and Multiple Bibliographies

This example demonstrates the quite complex options for assigning labelprefices to bibliographies and how citations decide which bibliography to point to. The default rule is that a citation will point to its entry in the last bibliography in which it appears. This can be overridden by explicit assignment to particular refcontexts with the `\assignrefcontext*` macros. Look in the source of this document for details.

This is a publication by Aristotle: [R1]

These are not publications by Aristotle: [Q1] [1] [Q2]

This is another publication by Aristotle: [R2]

Aristotle Publications

[R1] Aristotle. *De Anima*. Ed. by Robert Drew Hicks. Cambridge: Cambridge University Press, 1907.

[R2] Aristotle. *Physics*. Trans. by P. H. Wicksteed and F. M. Cornford. New York: G. P. Putnam, 1929.

Other publications

[Q1] Myeong S. Yoon et al. “Palladium pincer complexes with reduced bond angle strain: efficient catalysts for the Heck reaction”. In: *Organometallics* 25.10 (2006), pp. 2409–2411.

[Q2] Pablo Piccato. *City of Suspects. Crime in Mexico City, 1900–1931*. Durham and London: Duke University Press, 2001.

More Other publications

[1] Martha Nussbaum. *Aristotle’s “De Motu Animalium”*. Princeton: Princeton University Press, 1978.

[2] Pablo Piccato. *City of Suspects. Crime in Mexico City, 1900–1931*. Durham and London: Duke University Press, 2001.
